# Connecting young research group leaders

**Fostering networking and  
collaboration across the world**

As of March 2020

The EMBO Global Investigator Network will support the career development of the next generation of scientific leaders in Chile, India, Singapore and Taiwan by providing them with opportunities to interact and collaborate with leading scientists across international borders.

**Noel Lowndes**  
Committee Chair,  
EMBO Global Investigator Programme

## About the EMBO Global Investigator Network

The Global Investigator Programme was launched in 2019 to forge a network that supports the next generation of scientific leaders that have started their laboratories in EMBC Associate Member States (currently India and Singapore) or in countries or territories covered by a cooperation agreement with EMBC ([embc.embo.org](http://embc.embo.org)) (currently Chile and Taiwan). The Programme provides the selected scientists with opportunities to interact with other researchers worldwide, allowing for the establishment of cooperation.

## EMBO stands for excellence in the life sciences

EMBO is an organisation of more than 1800 leading researchers – the EMBO Members – that promotes excellence in the life sciences in Europe and beyond. The major goals of the organisation are to support talented researchers at all stages of their careers, stimulate the exchange of scientific information, and help build a research environment where scientists can achieve their best work.

## What are the benefits for EMBO Global Investigators? Funds are available for

Visiting laboratories to give a scientific seminar or to plan or continue a collaboration

Training in research leadership and management skills through EMBO Lab Leadership Courses

Inviting researchers to give a scientific lecture at their institute

Organising joint group meetings with other laboratories

Attending or organising regional or international scientific meetings

Attending the biennial EMBO Global Investigator Network meeting

A lab retreat

Covering fees for publications in EMBO Press journals

Access to childcare support when attending conferences

For a complete list of benefits please look at the programme guide

## Eligibility and selection:

### Eligible candidates must:

- have been a group leader of a laboratory for at least one year and for less than six years on 1 January in the year of the application\*
- perform life science research in an EMBC Associate Member State (currently India and Singapore) or in a country or territory covered by a cooperation agreement with EMBC (currently Chile and Taiwan)
- have published at least one last author paper in an international peer-reviewed journal from work carried out in their laboratory

### Who selects the EMBO Global Investigators?

EMBO Global Investigators are selected by the EMBO Global Investigator Committee based on their scientific merit

\* Extended eligibility period for candidates with children or under exceptional circumstances may apply
