## JOIN THE WEBINAR

**MANAGING THE PEER REVIEW PROCESS**

March 25, 2021

Bentham Science invites you to attend the webinar and learn the tips for managing peer review process for publishing your research studies.

The process of research article peer review is the cornerstone of academic publishing. On this basis, the journals and publishers maintain the integrity of the publishing process and, at the same time, the authors are able to use comments to improve their work.

In this webinar, we will discuss how to manage the peer review process to maximize the reach, citations, and visibility of research publications. Dr. Gareth Dyke, a researcher with more than 20 years of experience in writing and publishing papers, and managing the peer review process, will discuss his own experiences and present some tips for successful peer review management.
